

Christian Coalition of America

...defending America's Godly heritage

ACTION ALERT

The House of Representatives will be voting on H.R. 596, a bill to Repeal the so-called "Patient Protection and Affordable Care Act," known as ObamaCare on Tuesday.

Christian Coalition of America will score the votes of the 435 members of the House of Representatives on the repeal of this onerous multi-trillion ObamaCare law which has -- contrary to the president's campaign promises including one that the average family would save \$2500 -- forced millions of Americans to lose their physicians, their insurance plans, and greatly increased the average family's premiums with insurance plans.

The Republican leadership in the House of Representatives appointed a working group to come up with legislation to replace ObamaCare including Energy and Commerce Committee Chairman Fred Upton (MI-6), Ways and Means Committee Chairman Paul Ryan (WI-1), and Education and the Workforce Committee Chairman John Kline (MN-2). These committee chairmen all realize that full repeal requires a well thought-out replacement strategy.

They will create ObamaCare repeal legislation which concentrates on patient-centered solutions to help people with the problems created by Obamacare for many years.

In the likely event that the United States Supreme Court rules in the court case now being considered in June -- *King v. Burwell* -- to overturn the patently illegal and unconstitutional decision by the Internal Revenue Service to offer ObamaCare subsidies to the insured in states which did not set up state exchanges (in some 36 states,) the House working group will have a contingency plan which is consistent with an ultimate full replacement of ObamaCare.
